Bathlift PM 48-6

The Petermann bathlift is based on a stainless high grade steel frame and offers absolute safety and greatest possible stability.

The compact one-piece lifter unit can be easily inserted in and removed from the bath tub and enables with its optionally adjustable or fixed back comfortable and relaxed bathing.

With a load capacity up to 170 kg and a 10 year guarantee the Petermann bathlift offers unbeatable quality features. Removable padded seat and / or back covers can be washed up to 60° C.

You cannot find a bathlift that suits better in almost any bath tubs and that meets perfectly all customers' requirements.

Transfer discs

Soft transfer disc with hygiene overlay

Soft discs are made of a very soft, flexible and skin-friendly material. The back side of the soft discs is made of an ultra-low friction material and makes the disc extremely easy gliding. The surface is made of a coated foam material and offers a comfortable and non-slip seat.

The soft discs are very flexible and with only 5 mm height; the user feels safe and comfortable when sitting on the bathlift. The soft discs allow optimum freedom of movement in the desired bathing position. The soft transfer disc can be fixed with a strip behind the bathlift back and avoids slipping to the front. The soft disc can be combined with a hard-wearing hygiene overlay that is used instead of the padded seat cover.

Soft disc and hygiene overlay together: a perfect solution for the transfer on and back from the bathlift. Both – soft disc and hygiene overlay – can be machine-washed up to 60° C.

Turntable (with sliding extension)

The discs are made of stable plastic covered with a comfortable padded material. The cover is also machine-washable.

The turntable with sliding extension has additionally a rail that is clicked underneath the disc and enables the transfer from the edge of the bathlift to the centre of the bathlift seat.

Bathlift - spring-drive mechanism

Bathlift Peter Pan®

Enjoy a relaxing full bath or a herbal or aromatherapy treatment! You can have a bath when, how and where you want!

Resist all known medical and other bath essences, with its own seal of hygiene, the Peter Pan® is even easier to clean and disinfect. Enter or leave your bath easily and safely – by yourself or with a little help – with the Peter Pan® bathlift. The Peter Pan® fits in any bath tub, even when you are on holiday. Spring-drive mechanism Peter Pan® is made of stainless steel and is extremely light in weight – only 8.8 kg. The Peter Pan® is adjustable to stand safely in your bath. There is no possibility of slipping or tipping. Peter Pan® can be lowered down to 8.5 cm above the bottom of the bath tub and is easy to raise again to its original height.

Stay mobile!

Say hello to the pleasure of a real bath! Without the backrest, Peter Pan® can easily be used in treatment baths and whirlpools. It can be simply placed into the bath as it only weighs 8.8 kg and can be lifted at any point on the seat base.

The soft cover disc moves in all directions except to the front, and makes it easy to transfer safely onto the seat while allowing optimum freedom of movement in the desired bathing position.

Bathlift - spring-drive mechanism

Bathlift Peter Pan® Junior

The Peter Pan® Junior, with its weight of 9 kg, can be placed in any bath tub without difficulty. It is operated with a removable crank handle and moves as light as a feather with the patented spring-assisted mechanism. The Peter Pan® Junior can be operated in the bath tub at any required height.

The drive, hand crank, top and bottom frame, scissor rod and spring mechanism are all rustproof stainless steel and the drive is maintenance-free. The Peter Pan®, with its own hygiene seal, is very easy to clean and disinfect and it is resistant to all known medical and cleaning bath additives.

The Peter Pan® Junior “grows with the user”, which means it can be adjusted for any changes in weight of users during its life. The Peter Pan® Junior seat backrest can be inserted into one of three different holders for an optimum seating level for the user.

The adjustable headrest can also be adjusted for different situations. The washable rotation and transfer aid makes transfer from the edge of the bath tub to the Peter Pan® Junior and back easy. An adjustable lap belt and chest belt are included for safety and support.

It can also be used without the backrest. A gentle custom-fitted abduction unit can optionally be installed on the rotation and transfer aid.
